

*Elective Surgery/Anesthesia Authorization Form*

1308 N Scott Ave, Belton, MO 64012

Date \_\_\_\_\_  
Owner \_\_\_\_\_  
Phone # \_\_\_\_\_  
Pet \_\_\_\_\_

Your pet is being admitted for surgery today. Please be assured that the veterinarians at Belton Animal Clinic and Exotic Care Center use the safest anesthetics available, and that your pet is continuously monitored throughout the procedure. Regardless of an animal's age or apparent health status, however all anesthetic procedures have an element of risk.

A simple blood test can be performed on the day of surgery that will help to decrease the risk of anesthesia. A complete blood count and total protein will be performed to check for infection, hydration level and blood clotting. Additional tests allow us to check the function of the internal organs as well (such as liver and kidney values) and can alert us of some of the more common problems so that extra precautions can be taken.

Your signature below indicates that you have read this form and understand that there are risks associated with anesthesia.

\_\_\_\_\_ I have read the above information and **authorize** General Health Profile (\$92) or Geriatric Profile (\$114.50)

\_\_\_\_\_ I have read the above information and **decline** additional preanesthetic bloodwork
